

Delignit AG with significant increase in revenue and earnings in first half year of 2016

- **Revenue climbs to €24.4 million, up 6.4 percent**
- **Consolidated net profits increase by 9.9 percent to €0.7 million**
- **Management predicts new record revenue for 2016**

Berlin, 18 August 2016. Delignit AG, a subsidiary of MBB SE (ISIN DE000A0ETBQ4) and leading manufacturer of ecological, hardwood-based products and system solutions, has further increased revenue and consolidated net profits during the first half of 2016. Revenue climbed to a record €24.4 million, equalling a 6.4 percent increase over previous year's €22.9 million. Earnings before interest, tax, amortisation and depreciation (EBITDA) almost reach the previous year's level of €1.8 million at €1.7 million for the first six months of this year. Consolidated net profits were €0.70 million, an increase of 9.9 percent from previous year's €0.64 million. End of June 2016's equity ratio was a solid 45.2 percent.

Various product innovations of recent years have contributed to the pleasing business development both in the area of railway solutions within the section of Technological Applications and – in line with the strategy of “more revenue per vehicle” – within the Automotive section. In order to increase capacity for the expected revenue growth, Delignit AG has started an investment programme, the basis of which has been laid during the first half of 2016, already.

Management expects a continuation of the positive business development and predicts a new record level of revenue for financial year 2016.

The half year report will be published on www.delignit.com on 19 August in the investor relations menu.

About MBB SE:

MBB SE is a medium-sized family business that has expanded steadily since it was founded in 1995 through organic growth and the acquisition of companies.
